

Motorcycle Crash Card

A simple idea that could save your life!

What is the motorcycle Crash Card?

The motorcycle Crash Card is a small card that motorcyclists and their passengers can carry in their helmets. The card provides emergency service personnel with the rider's personal information saving valuable time and assisting with treatment, especially if the rider is either unconscious or unable to communicate.

How does it work?

The rider completes the details on the card, and places it in the lining of their helmet. A red sticker is placed on the outside of the helmet to alert emergency services about the card within the helmet. Then in the case of an accident, emergency services can quickly identify firstly if there is a Crash Card inside the helmet, and then the motorcyclist and/or passenger's personal details.

How do I get one?

You can order a Crash Card free of charge online. Just go to <http://www.hornsby.nsw.gov.au/community/common-enquiries/traffic-and-transport/motorcycle-crash-card>.

You will receive a folder containing two cards, two stickers, and other helpful information about what to do in an accident.

The CRASH Card has been produced in New South Wales by Hornsby Shire Council and is supported by NSW Ambulance, the NSW Police Force and Fire & Rescue NSW.
